SHORT PRESENTATION

My extended family has had and still has relatively many doctors, with me being part of its **2nd generation of physicians**: I was inevitably (and deeply!) influenced and guided from my childhood in the mysteries of biology in general and then attracted almost magnetically to **human medicine**, the science that has ... the honor to study and repair a **possibly divine creation**, the human being. I graduated the **General Medicine Faculty of the University of Medicine and Pharmacy ("UMF") "Carol Davila" Bucharest** ^[URL2] in 2007 and I chose **Pediatrics** as my specialization field: I have completed my **pediatrics residency** in 2013 at the **Clinical Emergency Hospital for Children "Marie S. Curie"** ^[URL2]. During my pediatrics residency I've learned a lot about children and their acute and chronic physical and mental health problems. In the following years, as a pediatrician specialist, I have gained experience in serious clinical cases (including children with relatively rare and very rare diseases). I am particularly interested in **pediatric nephrology**, **gastroenterology** (including **pediatric gastroesophageal reflux disease** ^[URL2], **diabetes mellitus** and other **nutritional diseases** ^[URL2]) and **pediatric pneumology**. The experience of recent years

has also brought me closer to **pediatric cardiology**, **rheumatology**, **neurology** (gaining **experience in the diagnosis and treatment/management of Duchenne and Becker muscular dystrophies**) and **pediatric psychiatry** (and **psychology**). I also created various **medical software** (among which an "**Electronic Pediatrician (EPed)**") that helped me in all these directions.

In the summer of 2017, as a speaker at the **Medical Symposium** of **Sika Medical Hospital**, I gave a presentation on gastroesophageal reflux disease (GERD) in children: this presentation can be downloaded in pdf format via **link1(RG)** and **link2(Academia.edu)**.

Also, in my recent years of pediatric practice, I have initiated independent research in **nutritional genomics** (aka "**nutrigenomics**"), which is a relatively new medical subdomain that deals with the study of molecules in foods (and dietary supplements) that have the potential to positively influence the regenerative and auto-regulatory capabilities of **human cells** (down to the **DNA/RNA** level), especially **NRF2 selective activators** ^[URL2]. The **ionized medical waters** (**ASEA redox supplement** (ARS), **kangen**, etc.) also drawn my attention, as they have some special (and very appreciated!) **physical**, **chemical** and **biological** properties which makes them good candidates for many protocols in the future official medicine (including pediatrics and especially preventive pediatrics, a medical branch with great importance).

(1) On **May 2018**, I've published **the first documented medical case (worldwide) about the remarkable effects of ARS ("ASEA") on a ~3-year old boy with Duchenne muscular dystrophy (DMD)** (for the main article published in the international peer-reviewed **CJBRT** see: **link1a**, **link1b**, **link1c** [CJBRT], **link2** [RG], **link3** [Academia], **link4** [Vixra], **link5** [GSJournal]; for the addendum-like preprint with DOI **10.13140/RG.2.2.23141.76002** presenting periodic updates on this 1st ARS-treated DMD case see: **link1** [RG]; for the older preprint, see **link1** [RG], **link2** [Academia], **link3** [Vixra] si **link4** [GSJournal]).

(2) On **30th August 2019**, I've published **the second documented medical case (worldwide) about the remarkable effects of ARS ("ASEA") on a 5-year old boy with Duchenne muscular dystrophy (DMD)** (for the preprint article with DOI **10.13140/RG.2.2.18399.41128**, see: **link1**[RG], **link2** [Academia], **link3** [Vixra]).

(3) On **24th May 2020**, I've published **the third documented medical case (worldwide) about the remarkable effects of ARS ("ASEA") on another 3-year old boy with Duchenne muscular dystrophy (DMD)** (for the preprint article with DOI **10.13140/RG.2.2.26419.99367**, see: **link1**[RG], **link2** [Academia], **link3** [Vixra], **link4** [GSJ]).

(4) On **9th November 2019**, I was invited as a lecturer at the **Medical Days of Râmnicu Sărat (town)** [**URL2(FB)**, **URL3(FB)**, **URL4(YT)**, **URL5(TV)**],

[URL6\(Google\)](#)], a conference where I briefly presented the vast field of redox medicine, the ASEA dietary supplement, but also part of my clinical cases in which I used ASEA as a single treatment or as adjuvant to allopathic treatment: the Microsoft PowerPoint presentation (launched at this event and later converted to pdf format) can be downloaded via [link1\(RG\)](#) and [link2\(Academia.edu\)](#).

(5) In August 2020, I have also published on my [Wikipedia public page/account](#) (but also in a separate session of Wikipedia discussions/"Talk") a complete list of my papers on Asea and Asea in DMD: [URL-Wiki](#), [URL-WikiTalk1](#), [URL-WikiTalk2](#) (URLs which correspond to the [Wikipedia page dedicated to Asea LLC company and „Asea” product](#)), [WikiTalkIPVariabil](#).

In my daily work, I put a lot of emphasis on the preventive component of pediatrics, which should be a priority for all doctors and patients alike. I am guided by [Christian](#) principles in both my medical practice and in my everyday life and I believe that all patients - and especially children - deserve an integrative approach so that to help them find the best preventive and/or curative treatments (predominantly natural and minimal allopathic).

I have published online **over 150 papers** until present, from which **38 papers on medicine** (and biology in general): a list of these papers can be downloaded in pdf format from this [link/URL](#).

A list of **claimed world premieres/priorities in medicine, mathematics, physics and music** can be downloaded from this [link](#).

A short... **musical self-presentation and a list of my representative musical works** can be downloaded from this [link](#).

I have published online **18 volumes** until present (2 vol. on *physics*, 1 vol. on *math*, 1 vol. of *literature* and 14 volumes of *musical sheets*)

(one may also download the [pdf version of this list](#)):

1. (**Bucharest, 2017**) *The gravito-informational significance of the fine structure constant: - implications in a four fields unification pattern at Planck scale and the existence of life forms in our universe* [[Amazon.com](#)] [[Amazon.de](#)] [[Amazon.es](#)] [[preprint](#)] [[article](#)] [Drăgoi; PSIJ, 15(3): 1-19, 2017; Article no.PSIJ.34613]

16. (**Bucharest, 2012**) *Guitar album – vol. 2, 1st edition* [[content](#)]

17. (**Bucharest, 2016**) *Multi-Instrumental album – vol. 1, 1st edition* [[content](#)]

18. (**worldwide, 2021**) *A sketch-version of a unifying beginners' cost-effective METHOD for any fretted string instrument* [[content](#)] [[content \(2\)](#)]

My main site (created by my own) is [WWW.DRAGOII.COM](#) (which automatically

redirects to WWW.DR.DRAGOIL.COM, which is a pasteboard-like site)

I've also designed multiple secondary sites to inform the general public about various medical conditions:

1. nrf2.dragoii.com (a website dedicated to the latest advances in the study of [NRF2 activators](#) and [nutrigenomics](#))
2. msr.dragoii.com (asea.dragoii.com) (a website dedicated to the latest advances in the study of **redox molecules therapy [stabilized oxidant and reductive [free radicals](#)]** with a strong selective NRF2 activation effect) (which therapy can be considered a [nutrigenomic](#) therapeutic tool with great perspectives and very large potential applicability)
3. kangen.dragoii.com (a website dedicated to [kangen water](#) and to [alkaline ionized waters](#) in general, waters with strong [reductive](#) properties, so that they may be also considered a great potential therapeutic tool of [nutrigenomics](#))
4. sucve.dragoii.com (a site dedicated to "green" juices, with multiple health benefits for children and adults; also a valuable tool of [nutrigenomics](#));
5. autism.dragoii.com (a website dedicated to the latest advances in the **diagnosis and treatment of children with [autism](#)**)
6. adhd.dragoii.com (a website dedicated to the latest advances in the **diagnosis and treatment of children with [ADHD](#)**)
7. dz.dragoii.com (a website dedicated to the latest advances in the **diagnosis and treatment of children and adults with [diabetes mellitus](#)**)
8. obez.dragoii.com (a website dedicated to the latest advances in the **diagnosis and treatment of [overweight](#) and [obese](#) children and adults**)
9. cancer.dragoii.com (a website dedicated to the latest advances in the **diagnosis and treatment of children and adults with [malignancies \[cancer\]](#)**)
10. hiv.dragoii.com (a website dedicated to the latest advances in the **diagnosis and treatment of children and adults with [HIV / AIDS](#)**)
11. down.dragoii.com (a website dedicated to the latest advances in the **diagnosis and treatment of children and adults with [Down syndrome](#)**)
12. neuro.dragoii.com (a website dedicated to the latest advances in the **diagnosis and treatment of children and adults with [neurological disorders](#)**)
13. med.dragoii.com (a medical website with notions of [pediatrics](#) and [general medicine](#), useful medical links, etc.)
14. biocel.dragoii.com (a website dedicated to the latest advances in [cell biology](#))

15. biomuz.dragoii.com (a website dedicated to the latest advances in the [neuroscience of music](#) and [music psychology](#))
